of Academic Excellence,
Progress, Partnership & Purpose
in Breast care*

**From 2015 to the
ASOMA Delhi Statement**

27 - 30

November

**NAMS Auditorium,
New Delhi**

ACS Chapter India

About the Conference

Future belongs to those who believe in the beauty of their dreams

...Eleanor Roosevelt

For the last many years, the Asian Society of Mastology has strived to improve outcomes for patients with breast disease by fostering practice-focussed education and multidisciplinary collaboration. The society has successfully brought together breast specialists from across all disciplines like surgical, medical and radiation oncologists, gynaecologists as well as pathologists, radiologists, nursing practitioners involved in breast care, breast nurses, trainees, surgery residents and medical students from across the globe.

Continuing this mission, ASOMACON 2025 will feature state-of-the-art informative sessions, prestigious orations and keynotes from the pioneers in the field and world-class presentations for which the conference is known as the main congress in the field of breast diseases in the Asia-Pacific region , it is the one that should not be missed!

We anticipate over 1000 delegates from across the world attending this mega-academic feast. You are all welcome to showcase your work in the form of podium presentations/ videos of surgical techniques/scientific papers/posters . In case you would like to share your research ,please get back with the theme and abstract as soon as possible since the slots are very limited.

The scientific program has been meticulously designed to offer a plethora of academic activities including MDTs, tumor board with eminent faculty, lively debates, and deliberations on crucial controversies in breast care, clinical case scenarios, scientific paper & poster sessions, discussion on evolving trend & management strategies and much more. There will also be a series of workshops preceding and during the meeting to address the educational needs of the audience. Pre-conference "hands on" cadaveric workshop where a large number of basic and advanced breast surgeries including oncoplastic procedures has been specially designed for the trainees and young surgeons to learn and perform under the supervision of eminent breast surgeons from across the globe. Would suggest all of you to encourage your fellows and trainees to register as soon as possible as the number of slots are limited. Like every year the breast imaging course that is hugely popular amongst all trainees and senior surgeons alike has been once again included to encourage all dedicated breast specialists to master the tricks and techniques.

Dehradun, the beautiful city is arguably one of the most sought after tourist destination in India. We are sure , you are going to not only enjoy the academics and camaraderie but also the well known hospitality of this grand city. We look forward to welcoming you all to this most exciting, inspiring and academically engaging ASOMACON 2025 and making this endeavour **"successful & special" with your participation.**
